+20 109 205 5779 ✦ ammo75180@gmail.com

EDUCATION

Bachelor of Science in Computer Science

September 2022 - May 2026

CHI, Cairo, Egypt

GPA: 3.38/4.00

PROJECTS

PDF Clone

2022

AI-Powered Document Chat Application

- Built a full-stack application that allows users to upload PDFs and interact with them conversationally using a local LLM
- Integrated **Ollama** as the local LLM backend using **Facebook's LLaMA** model for fully offline AI inference
- Developed the backend in **Python** handling PDF parsing, embedding generation, and query processing
- Designed and implemented a responsive frontend for seamless document upload and chat experience

Social Media Application

2023

Mobile Social Platform

- Developed a full-stack social media app supporting posts and community interaction
- Built the mobile frontend using **Kotlin** and **Jetpack Compose** following **MVVM** architecture for clean, maintainable code
- Designed and implemented a **Django** REST API backend handling authentication, feeds, and community management

Campus Hub

2026

Student Portal Mobile Application

- Developed a comprehensive student portal for managing campus events and announcements
- Built the mobile application using **Kotlin** and **Jetpack Compose** with **MVVM** architecture ensuring scalable and testable code
- Implemented a **Python** backend serving RESTful APIs for real-time event updates and student notifications
- Deployed as a practical solution for **Cairo Higher Institute** to streamline campus communication

SKILLS & INTERESTS

Languages

Python, C#, SQL

Frameworks

ASP.NET, .NET Core, Entity Framework

Databases

SQL Server

DevOps & Tools

Docker, Git, Linux

AI & LLM

Local LLM Integration, Ollama

Interests

Backend Development, API Design, Local AI Systems, Software Automation, Open Source
